Drought

31 2359MST

The drought continued across Southeast New Mexico with those stations that received precipitation measuring less than 1/2 inch. Some parts of the area did not measure any precipitation at all. Agricultural losses from the preceding year were still being calculated and will be included when reasonable estimates can be determined.

Drought

31 2359CST

The drought continued in January across West Texas with those stations that received precipitation measuring less than 1/2 inch. Many parts of the area, especially the south, did not record any measurable precipitation at all. Agricultural losses from the preceding year were still being calculated and will be included when reasonable estimates can be determined.

Hail (1.75)

2300CST

Widely scattered thunderstorms developed ahead of a winter storm system that approached from the west. A few of these storms had small hail, with the one isolated report of golfball size hail.
